## PROFESSIONAL SUMMARY

Computer Science Engineering graduate with 3 months of hands-on internship experience as a .NET Developer. Built and shipped RESTful APIs in a production healthcare application using ASP.NET Core (.NET 8). Practical experience in API development, bug fixing, database interactions, and working with Azure Blob Storage and SendGrid. Quick learner with exposure to a modern .NET backend stack and eagerness to grow further in backend development.

## TECHNICAL SKILLS

**Programming & Frameworks:** C#, .NET Core, ASP.NET Core, Web API, Angular

**Backend & Concepts:** RESTful Services, CRUD Operations, Routing, Controllers, Dependency Injection, HTTP Methods & Status Codes, Entity Framework Core, FluentValidation

**Cloud & Email:** Azure Blob Storage (file upload), SendGrid (email notifications)

**Databases:** SQL Server, MySQL, Stored Procedures, Joins, Indexes, Views

**Tools & Environment:** Visual Studio, Git, Swagger/Swashbuckle, Postman, Windows

**Exposure (learning):** JWT Authentication, Redis, SignalR, OpenIddict, Azure Service Bus, FCM

## EXPERIENCE

### Software Developer Intern

3 Months

*docIndia*

*Gurugram, India*

- Built RESTful APIs for appointment rescheduling, cancellation, and doctor-side reschedule acceptance workflows using ASP.NET Core (.NET 8)
- Set up email notifications to doctors upon patient confirmation using SendGrid, and created the corresponding HTML email templates
- Built a patient profile image upload API using Azure Blob Storage for cloud-based file storage
- Fixed a teleconsultation timing display bug where incorrect meeting times and meeting codes were being returned to the frontend
- Resolved a URL formatting issue where the backend was returning full static URLs, enabling the frontend team to use them directly
- Added a validation check to prevent duplicate practice location creation by verifying existence before performing an update
- Debugged and corrected wrong HTTP response codes and validation gaps across multiple API endpoints
- Gained exposure to JWT, Redis, SignalR, OpenIddict, Azure Service Bus, and FCM by working within a production codebase that uses these technologies

## PROJECTS

### Airbnb Clone Backend | *ASP.NET Core Web API, Entity Framework Core, SQL Server*

- Developed a RESTful Web API simulating an accommodation listing platform
- Implemented asynchronous CRUD operations using ASP.NET Core Web API
- Integrated Entity Framework Core with DbContext for structured data access
- Designed entity models using GUID-based identifiers for scalable data management
- Built structured API endpoints with proper routing, HTTP methods, and IActionResult-based response handling
- Enabled persistent data storage and retrieval using SQL Server

## EDUCATION

### B.Tech in Computer Science Engineering

CGPA: 7.14

*RGPV University*

*Bhopal, M.P.*

### Diploma in Computer Science Engineering

CGPA: 7.69

*People's University*

*Bhopal, M.P.*

### High School (CBSE)

Percentage: 65.8%

*Millia Convent English School*

*Purnia, Bihar*

## SOFT SKILLS

Strong analytical and problem-solving skills | Highly self-driven and quick learner | Good communication and teamwork abilities | Ability to adapt quickly to new technologies
